

Mod. ER CRS - ER CRD

Motocompressore

• Motocompressore con motore a scoppio a benzina 4 tempi. • Avviamento a strappo con fune autoavvolgente. • Testata bicilindrica monostadio in ghisa con valvole in acciaio Inox. • Completo di valvola automatica di messa a vuoto che mantiene la pressione costante nel serbatoio.

Petrol engine air compressors

• Air compressor with 4-stroke petrol engine. • Self rewinding rope starter. • Two-cylinders cast iron single stage head with stainless steel valve. • Complete with automatic vacuum valve, which maintains a constant pressure in the tank.

Petrol engine air compressors

• Air compressor with 4-stroke petrol engine. • Self rewinding rope starter. • Two-cylinders cast iron single stage head with stainless steel valve. • Complete with automatic vacuum valve, which maintains a constant pressure in the tank.

Petrol engine air compressors

• Air compressor with 4-stroke petrol engine. • Self rewinding rope starter. • Two-cylinders cast iron single stage head with stainless steel valve. • Complete with automatic vacuum valve, which maintains a constant pressure in the tank.

ER CRS 54-104-155-206

Petrol engine air compressors

• Air compressor with 4-stroke petrol engine. • Self rewinding rope starter. • Two-cylinders cast iron single stage head with stainless steel valve. • Complete with automatic vacuum valve, which maintains a constant pressure in the tank.

ER CRD 206-309

Motocompressore diesel

• Motocompressore altamente professionale con motore a scoppio diesel 4 tempi. • Avviamento elettrico con batteria. • L'installazione di serie del kit acceleratore e della puleggia centrifuga permette la disconnessione automatica della testata in mancanza di richiesta d'aria, riducendo consumi ed usura. • Completo di valvola automatica di messa a vuoto, batteria, filtro-riduttore-lubrificatore, ripartitore con attacchi multipli.

Diesel engine air compressors

• Professional air compressor with 4-stroke diesel engine. • Electric start with battery. • The serial installation of self throttle kit and of centrifugal pulley allows automatic disconnection of the head in lack of air request reducing consumption and wear. • Complete with automatic vacuum valve, battery Filter-reducer-lubricator, distribution manifold.

Diesel engine air compressors

• Professional air compressor with 4-stroke diesel engine. • Electric start with battery. • The serial installation of self throttle kit and of centrifugal pulley allows automatic disconnection of the head in lack of air request reducing consumption and wear. • Complete with automatic vacuum valve, battery Filter-reducer-lubricator, distribution manifold.
